

## Working Breathing Apparatus Course

### Description

The comprehensive course covers current legislation, hazard identification, safe working practices and use of working breathing apparatus

### Duration

A half day course consisting of theory and practical work.

### Syllabus

By the end of the course delegates will be able to: -

1. Select a charged compressed air cylinder and check its contents.
2. Connect/disconnect a cylinder to a BA set.
3. Adjust, test and connect a facemask.
4. Name and identify the component parts of a BA set.
5. Identify, test and operate ancillary equipment.
6. Perform a general test to the BA set.
7. Complete log book entries to record tests and maintenance.
8. Don and wear a BA set.
9. Perform a pre-entry test.
10. Clean and maintain a facemask.
11. Service and prepare a BA set.
12. Safely store a BA cylinder.
13. State and define the full duration of BA cylinders for a range of pressures.
14. State and define the working duration of BA sets.
15. State the factors that will affect/reduce the working duration.
16. State and define the safety margin.
17. Identify the need for effective BA control procedures.

### Certification

A certificate valid for 3 years will be issued on successful completion of the course.

### Numbers

A maximum of 8 students can be accommodated on this course

### Location

We are able to deliver this course on your site, subject to a pre-course assessment of your premises, reducing your costs in respect of additional time out travelling
